LUXAFLEX® *Pirouette*® SHADINGS

DESIGNER EXCLUSIVE INNOVATIVE SHADINGS

LUXAFLEX® Pirouette® Shadings provide softly curved, elegant horizontal fabric vanes attached to a sheer backing for an enhanced way of controlling light and privacy for you and your family.

Luxaflex Pirouette Shadings Fabric Collection offers 7 distinctly unique fabric ranges – Satin, Linen, Satin Metallic, Angelica, Bamboo Flax, Cotton and Shantung. The Fabric Ranges feature traditional, modern and fashion forward colour palettes ranging from warm, subdued hues to natural, earthen shades to vivacious, daring tones. Exclusively distributed through Luxaflex Window Fashions Galleries and David Jones, patented Luxaflex Pirouette Shadings provide a window covering solution like no other.

Combined with poised precision and elegant control, LUXAFLEX® Pirouette® Shadings will transform and reinvent any room.

PIROUETTE® *Features & Benefits*

UNIQUE DESIGN

Luxaflex Pirouette Shadings provide refined features with innovative design that creates a window covering solution like no other. The soft horizontal fabric vanes attached to a single sheer backing allow for enhanced views to the outside and full beauty of the fabric appearance on the inside. The sheer backing also reduces glare and filters harmful UV rays.

INNOVATIVE OPERATION

The revolutionary and patented Invisi-Lift System suspends the shadings' soft vanes for variable light control, allowing the vanes to be raised and lowered without obstructing the view.

VERSATILE FUNCTIONALITY

To finish your look with uninterrupted colour and texture, a matching fabric-covered headrail and bottom rail is standard on all Luxaflex Pirouette Shadings.

ULTIMATE FLEXIBILITY

Close the vanes for a smooth, more contemporary finish.

Slightly raise the vanes for a gentle contoured look whilst maintaining privacy.

Fully open the vanes to provide a clear view to the outside.

PIROUETTE® *Operating Systems*

Providing convenient control and enhanced child safety, the lifting systems available with Luxaflex Pirouette Shadings are both unique and innovative.

EasyRise features a continuous cord loop system for easy operation no matter the size of the shadings. The cord tensioner is mounted to the frame for enhanced child safety.

Ultraglide® Operating System features a retractable pull cord system that remains at the same length whether the shading is raised or lowered. The single cord operation means enhanced child safety.

PowerRise with Platinum Technology provides touch-of-a-button operation for precise light control, privacy and enhanced child safety. Choose among a hand-held remote or wireless wall switch.

SATIN

This silky fabric has a smooth, consistent pattern and a dense, rich weave giving the Satin Fabric Range a contemporary and sophisticated look with lustrous shine.

SATIN METALLIC

With an opulent twist on the Satin fabric range, Satin Metallic provides a luminous silver, gold or copper overlay to create an unexpected shimmer.

LINEN

With a classic and timeless pattern of linen, in a variety of earthen-tone colours, the woven Linen Fabric Range is the ideal choice to accent windows with a natural texture.

BAMBOO FLAX

A blend of contrasting yarns with intended v and dimension, Bamboo Flax is natural simplicity.

ANGELICA

Providing a unique option of matching sheer coloured backing, Angelica boasts saturated colours and elegance.

SHANTUNG

Offering a luminescent sheen combined with the look of raw silk in bold hues, Shantung adds drama to any room.

COTTON

The eco-conscious Cotton fabric range is made from 80% recycled yarns, providing a highly textured aesthetic in a deep natural colour palette.

Luxaflex Pirouette Shadings offer inspiring views and provide comforting privacy to effortlessly enhance your décor and maximise your view.

100mm Opened

100mm Closed

100MM VANE SIZE

Provides a classic, understated look with admirable view through.

120mm Opened

120mm Closed

120MM VANE SIZE

Makes a bold statement and creates a dramatic look for any window, whilst providing first-rate view through.

PIROUETTE® *Opacity*

The soft horizontal fabric vanes of Luxaflex Pirouette Shadings are attached to a single sheer backing allowing for enhanced views to the outside and full beauty of the fabric appearance on the inside.

Translucent

Translucent fabric vanes filter ambient sunlight, even when the vanes are closed, to provide a warm glow in any room.

Room Darkening

Room Darkening fabric vanes help darken your room and provide complete privacy without total darkness. Note: this is not a blackout product. A warm glow will filter between each vane.

PIROUETTE® *Fabric Bottom Panel*

The bottom fabric panel on Pirouette Shadings is adjusted to accommodate the height of the shading. The height of the bottom fabric panel varies with vane size and ordered height. This is a normal, inherent characteristic of the product. Depending on the shading height, the bottom fabric panel will vary in size up to 100mm for the 100mm vane size and up to 120mm for the 120mm vane size.

To ensure shadings are fabricated with bottom fabric panels of the same height, they must be ordered with identical height measurements, at the same time, in the same vane size, same fabric, and the same mounting style.

VANE ALIGNMENT

Side-by-side vane alignment can create a dramatic statement and uniform appearance in any room. To ensure optimal vane alignment in side-by-side shades, they must be of the same fabric style, colour, vane size, opacity and drop.

For shadings of the same fabric ranges, colour, vane size, opacity and drop, vane alignment should be within 3mm.

For shadings of different fabric ranges, colour, vane size, opacity and mounted at the same drop, the vane alignment should be within 8mm from one shading to another.

For reveal mounted shadings, if the ordered heights are within 10mm of one another, order both shadings using the greater of the two height measurements.

PIROUETTE® *Fabric Bottom Panel*

ZERO BOTTOM PANEL (ZBP)

As an alternative option to the varying bottom fabric panel on Pirouette Shadings, Zero Bottom Panel can be requested. Zero Bottom Panel eliminates the fabric panel at the bottom of the Pirouette Shadings, making it into an operable vane. This means that when the vanes are opened for view through, the last vane will also open and there will not be any fabric panels obstructing the view.

BEFORE

Face Mount With Flat Fabric Panel

AFTER

Face Mount With Zero Bottom Fabric Panel

The flat panel of fabric becomes a longer, operable vane

Due to the fabrication process and the nature of Pirouette Shading fabrics, note the below requirements and conditions for Zero Bottom Panel.

Mounting Requirements

- Only available with Face/Outside mount Pirouette Shadings

Pirouette Shadings Ordered Drop V Fabricated Drop

- The final drop of the window covering is dependent on the amount of fabric required to make the last vane operable
- The drop will be increased by up to 120mm
- Exact drop of the window covering cannot be predicted at point of order
- Order drop dimensions as per normal and the drop will be adjusted accordingly at point of fabrication
