Quality Innovative Window Furnishing Solutions

Bermuda 2000 Series

Our Australian Made Bermuda 2000 Series Shutters are custom made to fit any opening. With options of fixed, hinged, bi-fold or sliding, the Bermuda range offer the flexibility to create a more usable outdoor area for year round enjoyment.

Our Bermuda Aluminium Shutters are suitable for a range of installation types including patios, verandas, alfrescos and high-rise balconies to name a few.

Bermuda 2000 Series uses only the highest quality raw materials, hardware and finishes. Designed as a modern, functional plantation shutter, the Bermuda 2000 Series will bring low maintenance durability and style to your home, office, or commercial environment.

Built to withstand tough environmental conditions, our Australian made Bermuda 2000 Series Shutters can also be manufactured with strengthened construction, ideal for cyclonic areas. Our cyclone rated* shutters have been independently tested to successfully withstand the equivalent of up to 279kph winds (Category 4 Cyclones).

Extend your outdoor entertaining area, create more privacy and protect yourself from the elements.

Bermuda 2000 Series Shutters are also a practical, durable and stylish solution for internal applications.

Available in over 40 colours....

- + Off the wall mounting system available
- + Locking options available
- + Child Safe

Bermuda 1500 Series

Bermuda 1500 Series aluminium screening adds value, style, and privacy where you want it.

The 1500 Series features a 90mm elliptical louvre blade and comes with a range of standard and/or custom powdercoated colours. Screens can be manufactured in either a horizontal or vertical orientation and are available with a full “off the wall” mounting system using 50x50mm aluminium posts.

Ideal for privacy screens, fencing, pergola screens, carport screens and balcony sun control.

Bermuda 1000 Series

This economical screening option caters to a wide range of applications and has many installation options. The 1000 Series features either a 65mm or 40mm aluminium battens, comes in a range of standard or custom powdercoated colours and is built to withstand tough environmental conditions.

Screens can be manufactured in either a horizontal or vertical orientation and are available with a full “off the wall” mounting system using 50x50mm aluminium posts.

Ideal for privacy screens, fencing, pergola screens, carport screens and balcony sun control.

Side Retention Awning System

The Side Retention system is developed to withstand Australia's harsh climate and coastal conditions.

The Side Retention system secures the fabric to the side channels using a zip system, ensuring there are no gaps while providing privacy, shade and shelter from the elements and insects. The zip is concealed inside the channel meaning there are no unsightly hems obstructing your view.

Manual operation via spring or gearbox and motorisation options via remote control, mobile phone or voice activation.

Rapid Fit

The Rapid Fit Awning system is designed to be extremely easy to install and can easily accommodate many different types of openings.

The Rapid Fit Awning's heavy duty bottom rail is supplied with locking bars, allowing for multiple locking options and heights.

The side channel design easily accommodates "out-of-square" openings.

Available in a wide range of colours and crank handle or motorised operation.

Wire Guide

Designed for areas like patios, pergolas and balconies, Wire Guide will keep your awnings on track, even in breezy conditions.

Architecturally designed stainless steel fittings and cables guide and secure the awning bottom rail.

Guide Rail

Created for ground floor windows, the slanted design sits out slightly from the base of the window, inviting breezes while still maintaining optimum privacy and heat protection.

Pivot

With a sleek and stylish front rail, matched with heavy duty flexible joints and super strong pivot arms, the Pivot Arm Awning is tough enough to withstand the elements.

Designed to deflect heat and glare while maximising light.

Multi-Stop

The Multi-Stop Awning features multiple stopping points allowing for superior light and glare control. Its streamlined appearance is unobtrusive and has no exposed cables or wires.

This awning system is only available with spring operation and features an easy twist locking bottom rail, making it extremely simple to operate.

Folding Arm

Classic Italian design, manufactured in Australia.

Maximum width of 8m and projection of 3.6m. Operation via gearbox and crank handle or motorisation. Fully retractable to the wall when not in use.

Straight Drop

The Straight Drop Awning is suitable for use as an external screen in a low wind area.

Our Straight Drop system is perfect for providing extra privacy and sun protection where required. Great for areas like patios, pergolas and balconies.

Ultrasec Security

Over the years security measures in homes have evolved to become the stylish and streamlined products that are on offer today.

The favoured method for securing doors and windows is an aluminium frame combined with a screen, which allows for a high level of visibility and airflow while maintaining a secure home, without feeling locked in.

Stainless steel mesh is recognised as the premium product, popular because it can withstand forced entry attempts while also allowing a clear and unobstructed view of the outdoors.

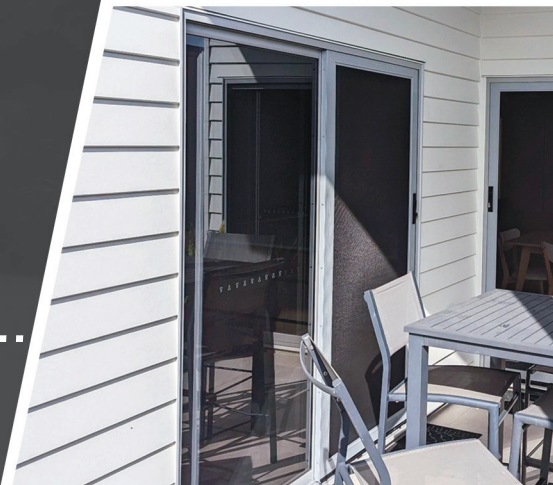

Ultrasec products are custom built in Australia and made to measure to your exact specifications.

With Ultrasec doors and windows, choosing a colour to match existing door or window frames from our extensive range of standard colours is easy. If a matching colour isn't available, contrasting colours can also be an attractive choice, or a non-standard powder coat colour option may also be available.

Ultrasec screens are made using high quality components and hardware and all security rated products in the Ultrasec range have surpassed expectations and comply with relevant Australian Standards
