## FEATURES AND BENEFITS

LUXAFLEX® EVERWOODS BLINDS

# IMPERVIOUS TO MOISTURE, IDEAL FOR HIGH HUMIDITY AREAS

---

**L**uxaflex EverWoods Blinds provide a practical alternative to timber blinds with the look of real wood and advanced technology making the blinds resistant to discolouration and warping.

## Performance

EverWoods Blinds are made from polystyrene which provides resistance to fading, cracking and peeling, allowing the blinds to be used in areas with high humidity, high temperatures and direct sunlight.

## Low Maintenance

The slats can be easily wiped clean with a damp cloth and unlike real timber, there is no need to re-stain the slats, making this a low maintenance product for years to come.

## Light and Privacy Control

Whether you want privacy or to allow filtered light through, EverWoods Blinds give you complete control over the amount of light you let into the room. The beautiful curved shape Valance that is 90mm wide hides all your hardware and eliminates light gaps.

## Uniform Appearance

EverWoods Blinds have been developed to capture the real look of wood and to eliminate any inconsistencies with colour, grain and pattern that you might traditionally find with real timber. This consistent wood look gives the blinds a more uniform appearance.

**EverWoods Blinds are resistant to cracking and peeling in high humidity areas such as bathrooms**
