FEATURES AND BENEFITS

LUXAFLEX® POLYSATIN® SHUTTERS

TIMELESS GRANDEUR WITH DURABLE DESIGN

Luxaflex® PolySatin® Shutters are the modern alternative to traditional wooden shutters and combine timeless grandeur with practical and durable design. They bring elegance to any interior with a soft, matte lustre finish.

They are made from an advanced polyresin compound and will look as luxurious as the day they were installed for years to come. Luxaflex PolySatin Shutters are backed by a 20 year warranty* and are guaranteed not to blister, peel, flake, corrode or fade.

Tough & Durable

Luxaflex PolySatin Shutters are virtually maintenance free. They are not painted, so they will never need re-painting. Fashioned from a technologically advanced polyresin compound, they will not blister, peel, flake, corrode or fade, and are UV-stabilised for many years of performance in even the harshest climates.

Easy Care & Cleaning

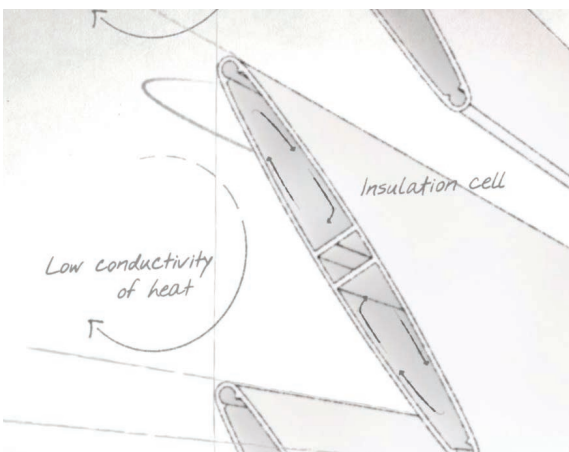

Ink, crayon and other staining agents do not hold to the smooth surface and in most cases soap and water is all it takes to remove blemishes. Removing the shutters for cleaning is a breeze and can be done by a single person in seconds.

Water Resistant Design

The non-porous surface makes them the perfect choice for bathrooms, kitchens and high humidity areas. Luxaflex PolySatin Shutters are unaffected by water or wood-destroying organisms, and are therefore mould resistant.

If opting for motorised shutters in bathrooms, these must be kept away from direct running water, such as in the shower.

Energy Efficient

Luxaflex PolySatin Shutters are completely adjustable, allowing you to fully control the solar energy entering your windows and doors. Their cellular construction creates a layer of energy-saving insulation as it traps air within a distinct pocket. Coupled with polyresin's low conductivity, they greatly reduce heat exchange. PolySatin Shutters reflect inbound solar rays back to the outside during summer, but can be opened to allow the warming sun into your home in winter thereby reducing air-conditioning costs.

Luxaflex PolySatin
Shutters can be custom
made to fit many different
shaped windows.

APPLICATION STYLES

LUXAFLEX® POLYSATIN® SHUTTERS

POLYSATIN® SHUTTERS: APPLICATION STYLES

Hinged & Hinged Bi-Fold

This classic plantation shutter look consists of shutter panels that are hinged to a frame or window opening. Standard hinged systems can consist of one or more shutter panels hinged in a variety of configurations. Single panels can be individually hinged or two panels may be hinged together from the frame in a hinged bi-fold design.

Bi-Fold on Track

The Bi-Fold on Track System allow up to eight panels to be hinged together. Panels are connected to a top and bottom track, which both supports the panels and guides their folding movements. Bi-fold shutters are perfect to accommodate large windows or sliding glass doors.

Bypass on Track

The Bypass on Track System allows shutter panels to slide past each other on top tracks to open and close, and is perfect for sliding glass doors. This system also allows you to cover wide widths, and is a wonderful way to treat sliding doors to match the rest of your windows.

Bi-fold shutters are perfect to accommodate large windows or sliding glass doors.

DESIGN OPTIONS

LUXAFLEX® POLYSATIN® SHUTTERS

POLYSATIN® SHUTTERS: DESIGN OPTIONS

SPECIALTY SHAPES AND APPLICATIONS

Luxaflex PolySatin Shutters can help you to achieve a stylish look along with beauty, durability and reliability in almost any window as our shutters can be custom made to fit many different shaped windows.

Bay & Corner Windows

PolySatin Shutters can also be applied to bay windows, corner windows and bow windows, usually as standard rectangular installations.

Arches

Arches can come in many different sizes and configurations, including stationary, extended, half circle, half moon, quarter circle, perfect, imperfect and eyebrow arches.

Angles

Angled windows come in many variations, including right triangles, isosceles triangles and top/bottom-sloped windows.

Hexagons & Octagons

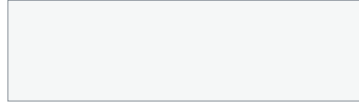

While unique window shapes such as hexagons and octagons are not as common as other window shapes, Luxaflex Window Fashions still offer you the opportunity to cover them.

TIMELESS COLOUR OPTIONS

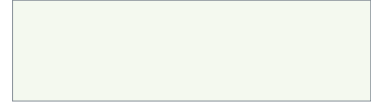

Luxaflex PolySatin Shutters are offered in three neutral colour choices to enhance any décor with their soft, matte lustre providing the look of a freshly painted shutter that will last for years to come. Our hinges are available in white, pearl, brass and stainless steel to coordinate with your preferred shutter colour.

White

Pearl

Vanilla

LOUVRE SIZES

Choose from a selection of three different louvre sizes to achieve different lighting, ambience and view-through.

64mm

89mm

114mm

OPERATION

Choose from a selection of three manual operating styles to match your home, from classic to contemporary.

SmartView®

A patented gear-driven system for one-touch control and an unobstructed view. This system completely eliminates the traditional rear or front tilt bar allowing you to adjust the louvres easily by hand. With no cords, this makes it the perfect child and pet-friendly option.

Clearview

With Clearview you have an unobstructed view by having the tilt bar located on the window side of the louvre, giving the shutter a clean and contemporary look.

Traditional Tilt Bar

This provides the time honoured look associated with traditional shutters that can close in both directions, unlike many shutters which are one-directional only. Our patented tilt bar has eliminated unsightly gears or staples which tend to rust or break.

POWerview SHUTTERS

LUXAFLEX® POLYSATIN® SHUTTERS

INTELLIGENT SHADES THAT SIMPLIFY YOUR LIFE

By combining Luxaflex PolySatin Shutters with PowerView Motorisation, the world's most beautiful window fashions are now the most intelligent. This innovative wireless operating system automatically controls and powers a wide range of Luxaflex internal and external window covering products creating the perfect room ambiance morning, noon and night.

Simply program PowerView to tilt your PolySatin Shutters according to the position you set and then control and schedule them using the intuitive PowerView App. Perfect lighting, energy efficiency, everyday convenience – it's all delivered automatically with PowerView.

"PowerView is a cost effective automation solution. Integrate with your existing home automation systems to create a whole-home connected experience."

Take Control

You can operate your shades with the touch of a button using the stylish Pebble® Remote Control, smartphone or tablet device (via the PowerView App), or with voice command using Google® Home, Apple HomeKit® or Amazon® Alexa®.

The PowerView Pebble Remote Control is ergonomically designed and is available in ten colours. Control up to six groupings of window treatments either individually or together.

The PowerView Pebble Scene Controller features an advanced display screen that lets you conveniently preview and select room scenes that have been programmed using the PowerView App.

Flexible Schedules

The PowerView App unlocks the full potential of PowerView Motorisation. Using the App on your smartphone or tablet, you can quickly create customised Scenes or schedules that control all the shades in your home to operate together or in any combination you desire. Easily schedule those Scenes to move your shades automatically at a set time or coordinate with Sunrise and Sunset.

Energy Efficient

Use customised scenes to tilt your shutters' louvres according to the sun's daily patterns. Having your louvres positioned just right can reduce solar heat gain in the summer and heat loss in the winter, and will help lower your energy bills.

Secure

The RemoteConnect feature, along with an internet connection, allows you to operate your shutters from anywhere in the world, using your smartphone or tablet.

Child Friendly

Along with the added convenience of cordless operation, PowerView creates a safer environment for homes with young children and pets.

Battery Powered

PolySatin Shutters with PowerView Motorisation are battery powered so an electrician is not required for installation. The battery pack is hidden in the top or bottom rails, so there is nothing to mar the beauty of your shutters.

Smart Home Automation

PowerView is a cost effective automation solution. The PowerView Hub can integrate with your existing home automation systems like Google Assistant, Apple HomeKit and Amazon Alexa to create a whole-home connected experience.

Why choose PowerView Shutters?

Luxaflex PolySatin PowerView Shutters are ideal for high or hard to reach window locations or any windows where the ease of hands free operation is desired. An exclusive override feature allows manual operation without causing any damage to the motor.

In most cases, you can operate multiple louvre sections horizontally across 2 separate panels using a single motor for a cost-efficient design.

Both the motor and battery pack are cleverly concealed within the frame for a sleek, unobtrusive finish.

Child Safety

The entire range of Luxaflex PolySatin Shutters are cord free and designed with safety in mind for both young children and pets. They are compliant to the latest ACCC Child Safety Regulations to ensure they are safe for the occupants and visitors to the home.

Australian Made Quality

The Luxaflex PolySatin Shutters range is made-to-measure in our Australian factories to our specific quality standards using highly specialised equipment and Australian workers. Our commitment to supporting local manufacturing allows us to provide fast production times and superior after sales support whilst creating employment opportunities in Australia.

20 Year Warranty⁺

Our PolySatin Shutters are specifically designed for demanding Australian weather conditions. They are guaranteed not to blister, peel, flake, corrode or fade, and come backed with our 20 Year Manufacturers Warranty⁺.

GreenGuard[®] Certified for Indoor Air Quality

Fabric window treatments can produce microscopic, inhalable airborne fibres, and are able to harbour mites, mould, mildew and bacteria in their porous surfaces. Luxaflex PolySatin Shutters create no dust and their non-porous surfaces provide a barrier against harmful organisms, unlike fabric blinds. The polyresin compound in our shutters are formaldehyde-free and meet the certification requirements set by GreenGuard for Low Chemical Emissions.

Plantation Shutter Applications

In general, plantation shutters are not designed or intended to provide complete light blackout when closed and are designed primarily to allow the user to easily and efficiently control light and airflow[^].

THE LUXAFLEX DIFFERENCE

LUXAFLEX® POLYSATIN® SHUTTERS

Innovation is our Heritage

Luxaflex Window Fashions has been a leading brand in Australian homes since 1954. With a Dutch heritage, design and innovation are at the core of the brand. The Luxaflex brand has continued to expand the Australian product range, combining the best of international and local innovations.

Industry Leading Designs

Many of our products are patented and exclusive to Luxaflex Window Fashions. Our entire range is engineered and thoroughly tested to meet the high quality standards of the brand, but also to deliver high performance in our harsh Australian environment.

Personalised Service

All Luxaflex products are custom made to your window requirements so they fit perfectly. Our Luxaflex showrooms provide the ultimate experience, from your initial enquiry and showroom visit through to the after-sales service.

Australian Made Quality

Supporting local jobs, most of our product range is made to measure in our Australian factories. Our local production ensures we maintain strict quality controls and faster lead times for our customers. We stand behind our products by offering a 5 Year Manufacturer's Warranty[#].

Child Safety

All Luxaflex Window Fashions are designed with safety in mind and are compliant with the latest ACCC Child Safety Regulations to ensure they can be operated in a safe manner.
