FEATURES AND BENEFITS

LUXAFLEX® ROLLER BLINDS

STYLISH APPEARANCE AND SMOOTH OPERATION

Only Luxaflex® Window Fashions offer all the parts made by the one manufacturer. This means that Luxaflex fabrics, components and Hunter Douglas motors are manufactured with the highest quality standards and the end products are assembled by our experienced team here in Australia.

Luxaflex Roller Blinds with patented EDGE Technology provide a stylish appearance and smooth operation, combining sophisticated technology with a variety of the finest fabrics ranging from blackout to light filtering sunscreens. We elevate this go-to classic with premium fittings and bespoke production for every blind.

Single Roller Blinds

Single Roller Blinds include one fabric type in either sunscreen, sheer, translucent or blackout opacity. They are a simple, yet sleek window covering solution that can be used to complement or make a bold statement in a space.

Dual Roller Blinds

Dual Roller Blinds combine the functionality of two different fabrics in the one Roller Blind system for the ultimate light and privacy control. Pair your choice of blackout fabric with either a sunscreen or sheer fabric for a diffused glow during the day and complete privacy and light control of an evening. Dual Roller Blinds are ideal for bedroom and living room applications.

Linked Roller Blinds

Linked Roller Blinds are a great solution for extra wide windows and large window banks that cannot be covered with one blind.

What makes this option desirable for wide windows is that all blinds can be operated using one chain or motorised control. Linked Roller Blinds also help to reduce light gaps between adjacent blinds as they can be fitted more closely together. A 45° and 90° linked mechanism is also available for bay and corner window installations.

Heavy Duty Roller Blinds

An effective solution in applications where large windows need to be covered. Available in both chain drive and motorised operation, this system allows for wide spans and supports longer drops than our standard roller blinds whilst being just as beautiful and easy to use.

CONFIGURATIONS & FABRIC OPACITY

LUXAFLEX® ROLLER BLINDS

ROLLER BLIND CONFIGURATIONS AND FABRIC OPACITY

Roller Blind Configurations

Roller Blinds are one of the most versatile window coverings and can be fitted in a variety of configurations depending on the type of window, application style and desired aesthetic.

Standard Roll

The standard (under) roll configuration ensures the blind can be fitted as close as possible to the window.

Reverse Roll

The reverse (over) roll configuration provides a sleek surface and a self-pelmet effect.

Face Fit

Mounted to the outside of the window architrave, for maximum light blockage and privacy. This is ideal for windows with shallow reveals especially in bedrooms, living areas and bathrooms.

Reveal Fit

Roller blind is mounted to the inside of the window architrave, for a neat and compact finish.

Roller Blind Configurations

The Luxaflex Fabric Collection provides you with many choices for colour, texture, opacity, trims, operating methods and durability. Team different opacities in different rooms to suit your light, heat and privacy requirements.

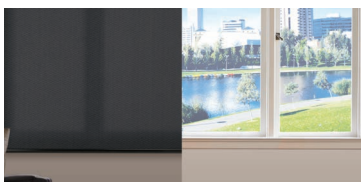

Sunscreen

Sunscreen fabrics allow for heat and light control whilst maintaining your view. Perfect for reducing glare and heat in a room exposed to the sun. Layer with blackout fabrics to give night time privacy.

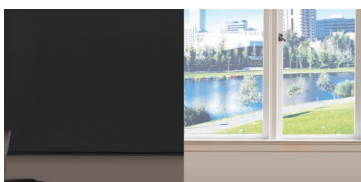

Sheer

Sheer fabrics give daytime privacy and some filtered view through subject to the texture and weave. Layer with blackout fabrics to give night time privacy.

Translucent

Translucent fabrics screen out harsh light, but do not allow a view through. They bring texture or patterns to life whilst providing daytime and night time privacy.

Blockout

Blockout fabrics offer the ultimate level of privacy, day and night, whilst helping to insulate the room. Blockout fabrics offer room darkening capabilities, ideal for bedrooms and home theatre/TV rooms.

Mould and Microbial Growth

Households are increasingly becoming aware of chemicals in products that cause or exacerbate allergies, particularly in children. That's why many consider materials which can repel moisture and are not affected by mildew, mould or microbial growth. Sanitized® Antimicrobial Protection is used in many Luxaflex fabrics and can effectively reduce the development of bacteria, odour and mildew in the home, promoting a healthy living environment.

Easy to clean and maintain

Many Luxaflex Fabrics are treated with Duraguard® Fabric Protector, which effectively repels most stain causing agents with its proven, water based, preventative, formula. Fabrics with Duraguard Fabric Protector have good resistance against rain and water-based stains, and excellent protection against oil-based stains. This is a great feature particularly for young families as it helps protect fabrics from oily stains, spills and fingerprints.

Fade Resistant

Luxaflex fabrics undergo stringent testing to ensure they resist fading and maintain their original appearance for many years. All Luxaflex fabrics have been tested for colour or light fastness on a scale from 1 to 8, where 8 is most fade resistant from exposure to light. The Luxaflex quality standard is 6 and above. Many other blind and curtain fabrics available in Australia do not pass these tests resulting in a shorter product life.

Fire Retardancy Information

All Luxaflex fabrics are suitable for residential applications. They have been designed specifically to inhibit the spread of flames and smoke in the event of a fire. These fabrics are independently tested in accordance with the Australian Standard.

Child and Pet Safety

We understand the importance of safety in the home, especially for those with young children and pets. That's why all Luxaflex Window Fashions are designed with safety in mind and are compliant with the latest ACCC Child Safety Regulations to ensure they can be operated in a safe manner. From smart cordless options to motorised operation systems, we offer many innovative lifting systems designed with safety, convenience and beauty in mind. Coupled with hundreds of fabric styles and opacities, Luxaflex Roller Blinds can ensure optimal light control and insulating properties, along with easy care and cleaning and lasting quality for peace of mind for the whole family.

Single Roller Blind that is made in Australia to filter the Australian sun.

OPERATING SOLUTIONS & EXTRAS

LUXAFLEX® ROLLER BLINDS

SELECT AN INNOVATIVE OPERATION

OPERATING SOLUTIONS & OPTIONAL EXTRAS

Operating Solutions

Our extensive range of innovative operating systems for Roller Blinds include manual chain operation, cordless and motorised solutions. Designed for simplicity, ease of use and enhanced child safety, sleek Luxaflex Roller Blinds offer smart lifting solutions to suit any home and lifestyle.

Chain Drive

Luxaflex Edge Roller Blinds can be easily operated via a durable chain drive mechanism. Select from a wide range of plastic chains available in tonal colours, or opt for the premium Aluminum finish.

LiteRise

An easy and completely cordless operating system offering smooth and light control along with the added benefits of child safety. LiteRise operation features a unique spring mechanism that allows for integrated and granular control of your shades. Unlike traditional Spring Operated Roller Blinds, the intuitive Edge LiteRise Roller Blind is raised and lowered by hand at the bottom rail for smooth light operation.

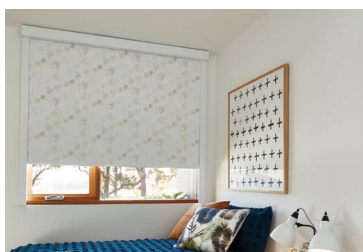

Motorised

Luxaflex Window Fashions offer a large range of motorised options for your Roller Blinds. Whether you are after integration with a home automation system for control via app or voice command, or simple control via wall switch or remote control, we have a solution to suit every requirement and budget. Motorised Roller Blinds deliver the ultimate convenient living solution, whilst providing full child safety with no exposed cords or chains.

Optional Extras

Luxaflex Roller Blinds come with a variety of optional extras that allow you to tailor the window covering for your specific needs. Whether it's to enhance your blind's style or functionality, a Luxaflex design expert can guide you through our range of options.

Head Box and Side Channels

A sleek and contemporary head box and fascia system is available in 2 size options (89mm or 100mm) in Anodised, Black, White, or Magnolia. The addition of a head box is a great way to complete the overall look of your Roller Blinds, and when paired with side channels, will provide complete room darkening as light bleed from the top and sides of your blind is eliminated. This is ideal for bedroom and theatre room applications.

Dual Roller Blind Fascia Headbox

For dual roller blind applications, allowing the top of the exposed roller blinds to be discreetly hidden away, providing a neat ultra-modern finish as well as offering an improved blackout solution.

Premium Metal Chain Drive

A highly durable hardware and operating system that allows for high sound absorption whilst delivering smooth and reliable operation.

Heavy Duty Cable Guide

Featuring stainless steel wire cables that are clear-coated for increased durability, the Heavy Duty Cable system helps guide the bottom rail providing an even, controlled movement with reduced tracking. This is ideal for securing large blinds in place.

POWERSVIEW MOTORISATION

LUXAFLEX® ROLLER BLINDS

SELECT AN INNOVATIVE OPERATION

POWERSVIEW® MOTORISATION

With Luxaflex® PowerView® Motorisation, the world's most beautiful window fashions are now the most intelligent. This innovative wireless operating system automatically controls and powers a wide range of Luxaflex internal and external window covering products creating the perfect room ambiance morning, noon and night.

Simply program PowerView to move your window shades to the exact position you want and then control and schedule them using the intuitive PowerView App.

“PowerView is a cost effective automation solution. Integrate with your existing home automation systems to create a whole-home connected experience.”

Take Control

You can operate your shades with the touch of a button using the stylish Pebble® Remote Control, smartphone or tablet device (via the PowerView App), or with voice command using Google® Home, Apple HomeKit® or Amazon® Alexa®.

The PowerView Pebble Remote Control is ergonomically designed and is available in ten colours. Control up to six groupings of window treatments either individually or together.

The PowerView Pebble Scene Controller features an advanced display screen that lets you conveniently preview and select room scenes that have been programmed using the PowerView App.

Flexible Schedules

The PowerView App unlocks the full potential of PowerView Motorisation. Using the App on your smartphone or tablet, you can quickly create customised Scenes or schedules that control all the shades in your home to operate together or in any combination you desire. Easily schedule those Scenes to move your shades automatically at a set time or coordinate with Sunrise and Sunset.

Battery Powered For Ease

Most PowerView blinds are battery-powered making them easy to install with no electrician required and are simple to operate and maintain. The battery-pack is hidden behind the headrail so there's nothing to mar the beauty of your window shades.

Child Friendly

Along with the added convenience of cordless operation, PowerView creates a safer environment for homes with young children and pets.

Energy Efficient

Customise Scenes to ensure your windows are shaded during the peak sun exposure times during summer and cooler times during winter to control solar energy throughout the seasons and keep the sun from fading your furniture.

Secure

The RemoteConnect feature, along with an internet connection, allows you to operate your shades from anywhere in the world, using your smartphone or tablet.

Smart Home Automation

PowerView is a cost effective automation solution. The PowerView Hub can integrate with your existing home automation systems like Google Assistant, Apple HomeKit and Amazon Alexa to create a whole-home connected experience.

SELECT AN INNOVATIVE OPERATION

QMOTION & MERGER MOTORISATION

QMotion®

Luxaflex Roller Blinds powered by QMotion were designed with a focus on making motorised window coverings simple, functional and stylish. Unlike conventional motorised shades, Luxaflex Roller Blinds powered by QMotion are remarkably quiet. Their movement is smooth and virtually silent and you can also adjust the blind position manually by hand, a feature exclusive to QMotion. In addition, QMotion Technology Roller Blinds are completely cordless which makes them child and pet safe.

QMotion ZigBee Technology

Luxaflex Roller Blinds with QMotion ZigBee technology is the answer to integrating QMotion into Control4 automation systems. The QMotion ZigBee motor communicates natively with Control4, which means no additional accessories are required for direct wireless communication.

Other motorised solutions

Other options include Merger® motors (Merger Remote, Merger Integrated Lithium battery, Merger Switch or Merger Remote 37) or the premium European motor solutions from Somfy® (Somfy Remote or Somfy Switch).

THE LUXAFLEX DIFFERENCE

LUXAFLEX® ROLLER BLINDS

Innovation is our Heritage

Luxaflex Window Fashions has been a leading brand in Australian homes since 1954. With a Dutch heritage, design and innovation are at the core of the brand. The Luxaflex brand has continued to expand the Australian product range, combining the best of international and local innovations.

Industry Leading Designs

Many of our products are patented and exclusive to Luxaflex Window Fashions. Our entire range is engineered and thoroughly tested to meet the high quality standards of the brand, but also to deliver high performance in our harsh Australian environment.

Personalised Service

All Luxaflex products are custom made to your window requirements so they fit perfectly. Our Luxaflex showrooms provide the ultimate experience, from your initial enquiry and showroom visit through to the after-sales service.

Australian Made Quality

Supporting local jobs, most of our product range is made to measure in our Australian factories. Our local production ensures we maintain strict quality controls and faster lead times for our customers. We stand behind our products by offering a 5 Year Manufacturer's Warranty#.

Child Safety

All Luxaflex Window Fashions are designed with safety in mind and are compliant with the latest ACCC Child Safety Regulations to ensure they can be operated in a safe manner.
