FEATURES AND BENEFITS

LUXAFLEX® SILHOUETTE® SHADINGS

INSPIRED BY DESIGN, CRAFTED WITH CARE

Silhouette Shadings, featuring signature S-shaped vanes, combine elegance with functional design to bring simple elegance to any room. Transforming harsh sunlight into a gentle, diffused glow, this unique shading offers limitless design options in a range of gorgeous fabrics.

Advanced fabric technology maintains the shape of the S-Vane for years to come

Distinctive Design

Our focus on quality, innovation and design excellence stems from our original Silhouette Shadings invention. Cleverly engineered, Luxaflex Silhouette Shadings feature soft S-shaped vanes between two sheer fabric panels for an elegant appearance of floating vanes. The unique S-shaped fabric vanes bounce incoming light up onto the ceiling and naturally brightens the room. Choose from three vane size options 50mm, 65mm and 75mm.

Well engineered for a clear view through

Eliminate Moiré Effect

We designed the weave on the front and rear sheer facings to avoid moiré effect at the window. Moiré is a visual strobing effect that occurs when an open fabric weave is placed in front of another similar weave, obstructing the view through and potentially causing headaches or migraines. Many imitation products are known to do this. Don't settle for anything less than the original and the best.

Softly filters sunlight

Transforms Harsh Sunlight

The sheers softly filter light protecting flooring and furnishings from harsh UV rays. Simply tilt the vanes to achieve your desired level of light. Open the vanes for light diffusion and daytime privacy whilst maintaining a view through your window. Adjust the vanes for greater light deflection and privacy. Close the vanes for complete privacy and UV protection.
