LUXAFLEX® WINDOW COVERINGS

SEAMLESS COMFORT IS JUST ONE TOUCH AWAY

We didn't invent light. We just created a smarter, simpler and more convenient way to control how it plays through your daily life. Welcome to Luxaflex® PowerView® Automation.

With PowerView® Automation from the Luxaflex® Window Coverings range, the world's most beautiful window fashions are now the most intelligent. This innovative wireless system controls a wide range of Luxaflex window shades in your home. Operate a single blind or all of them in perfect concert – all on your command.

INTELLIGENT DESIGN

Diverse

With the widest array of innovative styles, colours and fabrics in the industry, your motorised blinds are as beautiful as they are intelligent.

Secure

Adjust shades while you are away via the RemoteConnect feature on your smartphone or tablet.

Battery Powered

Luxaflex Blinds with PowerView Automation use an environmentally friendly rechargeable battery wand, hidden behind the headrail so there's nothing to mar the beauty of your window shades.

Flexible Schedules

With the PowerView App, you can quickly create customised Scenes that control all the shades in your home to operate together or in any combination you desire. Then you can easily schedule those Scenes to move your shades automatically so you don't have to.

Precise Operation

PowerView® offers precise control of a variety of different Luxaflex® products and styles, whether up, down, tilt or traverse.

Child Friendly

Simple, cord free operation is aesthetically pleasing and safer for children and pets.

Energy Efficient

Easily link Schedules to sunrise and sunset times calculated by PowerView to control solar energy throughout the seasons or wake with the sun.

Whole-Home Integration

For the ultimate in convenience and control, PowerView seamlessly connects with Apple Homekit®, Google® Assistant and Amazon® Alexa® so you can control your blinds by voice command.

POWerview® AUTOMATION

LUXAFLEX® WINDOW COVERINGS

START SIMPLE

The PowerView® App is the starting point for the entire PowerView® system.

From the convenience of your phone or tablet, use the PowerView® App to operate your window coverings individually, by Room, or throughout the home using Scenes and Automations.

Easily activate present or customised scenes that move each of your shades to your preferred position. Schedule those scenes to operate on their own throughout the day. You can even schedule scenes to move with the sunrise or sunset.

Powered by Bluetooth technology

Easy, accurate shade control. Luxaflex Blinds with PowerView Automation shades will always be exactly where you want them, thanks to bluetooth technology, which features real time, two-way communication between your shades and the PowerView system.

SHADES MOVE IN SYNC

PowerView® technology ensures that bottom rail alignment is easier than ever. This means that your window coverings will begin to move at the same time and maintain alignment.

You can use the App to control up to four blinds to maintain alignment or a remote if you have up to 15 shades. For the best whole home control when shades are in multiple rooms, you can add the PowerView® Gateway.

OPTIONAL EXTRA WITH POWerview REMOTE

For more control and options, the Pebble® Remote is available as an optional extra to operate your window coverings.

With the remote you can organise different groupings of products to your preferences or set a “Favourite” position for your blind.

Raise, lower or traverse your blind with the open and close button or press stop to adjust any shade to your perfect, preferred position. The Tilt control buttons open, close and rotate vanes and slats.

For an added pop of colour, the Pebble comes in a range of colours to choose from.

The PowerView® Pebble® Remote is the perfect union of form and function, both simply elegant and elegantly simple.

THE GATEWAY TO AUTOMATE YOUR ENTIRE HOME

Create a personalised whole-home connected experience by integrating PowerView® Automation with compatible smart home systems. The PowerView® Gateway integrates PowerView® features with some of the most popular systems on the market. You can even control your blinds by voice command as PowerView® seamlessly integrates with Google® Assistant, Apple HomeKit® and Amazon® Alexa® for the ultimate experience in home automation.

With a PowerView® Gateway, you can access the RemoteConnect feature within the PowerView® App that allows you to access and control your blinds from anywhere in the world where there is internet connectivity. You can also remotely operate scenes, control individual blinds, as well as create, edit and delete scenes and automations.

LUXAFLEX® WINDOW COVERINGS

IT'S YOUR HOME

TAKE CONTROL LIKE NEVER BEFORE

1) PowerView® App

The PowerView® App is the starting point to set up, manage and operate your blinds. You can use your smartphone or tablet like a remote control for individual shades or the entire home.

2) Remotes

The easy-to-use handheld and wall mounted remotes are optional extras to help you control and adjust a single blind or an entire room with the push of a button.

3) PowerView Gateway

The Gateway is required if you want to operate your blinds remotely or to connect with your other home automation systems.

The PowerView System is designed to be compatible with most home automation system technologies on the market today, as well as Apple® iOS and Android® tablets and mobile devices to expand the function of your wireless home.
